Club

For club we started by helping the witch spirit, but there was a singing forest spirit on the way, so we decided to do that too. On the first encounter on the way, there was just some greenwall enchanters. On the second encounter on the way, thousands of fairies appeared, and we ran for our lives. Nobody got dropped because I had dispel magic. On the third encounter on the way, there was green, black, and red fairies, and we were doing capture mechanic (infinite reinforces, for example, if a black fairy carried a red fairy to their reinforce point, it would become a black fairy. The red fairies in the start, dominated with inferno aura, but then the black elidhu came in and wrecked them. When they were dropped by isaac, they did not reinforce as red fairies, nor did they reinforce as black fairies. On the fourth encounter, we saw the forest spirit singing near the greenwall. I dont remember the exact lyrics, but there were parts with "loyalty loyalty loyalty" and "darkness deep". With our priest levels, we found that it was a spell to charm the fairies. It also convinced the black spirit to come with it.

This mission counted as two missions, with the second encounter being the end of the first mission.

also somebody tried to steal the forest spirit's morganti dagger, found it was glued, and then got morganti dropped.

Electives

In electives we decided start by trying to set up a camp near the black spirit. My memory just turned to dust during electives. I know we did not die, but thats all i remember.

P.S there is a mountain growing near camp. we did not do this mission, but that is happening.
