Month 3

Inn 1 - We met with Chalc'ic Xitli
Notes: they kept on complaining about humming sounds
Mission 1: Strange humming around camp

- We investigated this sound and it became apparent that it was localized around crystalline
- We used crystalline power to see the magical fields
- Our research was inconclusive but we found the source to be magic

Mission 2: White mana shard

- I was not their for this but I believe it was a success
- They found elementals but did not fight them

Inn 2 - Met with Silluvium Zaria
Notes: the group that went to the white shard told everyone their theory that there would be a second mana surge

- Then we had lunch

After lunch there was a long discussion where we decided to go into a nearby mine to attempt to protect us while others stayed at the camp to help everyone else.
Once we were near the bottom of the cave we found a threshold and people where trying to open it when our mana started to surge and the crystalline over exposed to mana exploded causing the cave to collapse
