Month 5

Inn 1 - We met with Chalc'ic Xitli
Notes: we received letters from various places and learned about a catastrophic disaster that is impending that will cover the continent in crystalline dust. Some people have begun to try and figure out how to stop it. While I plan on trying to finish my tap so I can create a crystalline protection spell to protect the region. Using the layline to amplify the range of the spell.
Mission 1: we went to go talk to some people from the color woods

- They had some elemental speakers that I plan on hiring to hunt elementals.

Mission 2: people investigated strange figures

- I believe that these people would be belast trying to rebuild the ring road. It turns out it wasn't belfast. But I wasn't there so I have no idea

Mission 3: we found sleeping scouts

- Both missions 2 and 3 were in the same direction, but once we found the scouts people started to forget their abilities and we left as soon as possible. Latter we remembered what we forgot.

Mission 4: we fixed the tap

- As the mission name suggests we did just that.
