The Morganti Bear

We have encountered a morganti bear with a white crown. The bear has a trial called the “Trial Of The Bear". The bear is associated with inner fighting. The bear and a man appeared in the middle of a tourney in Belast. The man gave a speech about how Belast will face the trial of the bear. Then the bear and the man disappeared. We encountered it several more times snd a lone wild knight To beat the trial you have to say together when the bear asks you if you will stand alone or together. We would like to do together, but we do not know who we need to stand together with. There are also 3 more animals, the sickly transparent deer, the wolf made of swords and the white goat. The Wolf made of swords is related to war. But we do not know about the others. We know that Eldar has already finished all the trials many years ago. They had all of them. It took a whole season.
