Red Rash

The whole town of Belmouth has got red rash. Red rash gives you fatigue whenever you interact with a pyromancer. It also gives you red dots all over you. To cure it, either you can not interact with pyromancers for a month or you can get a level twenty healer to cure you.

We all got red rash from a wave of energy that passed over the area, giving us ten mana and a few other things. This happened when some crystalline from the crystalarium next to Belmouth was moved. It might be related to the rash.
