Anguron Missions & Inn Weekly Addition

Week 3

- [ ] [4]> Clear lava bridges for maintenance after earthquake
  There was an earthquake, thankfully the mage school does not believe there is any magic involved. There are lava bridges in Anguron to cross the lava rivers because it is all underground.
- [ ] [6]> Spar with fighters at dueling ring, help train

Help the fighters and us train by fighting at the dueling ring so we can finally beat Bellmorn and win.

- [x] ~~[9]> Exterminate cockroaches swarming teleport hubs~~
  We don't know for sure who did it. Syenon Mage School often pranks ours so it's almost certainly them. We gave them a taste of their own medicine. How this mission worked is we fought cockroaches with ∞ reinforces for 10 minutes and then they have no reinforces. After about 5 minutes everyone except one person was down and then that person survived for 5 minutes and got all the cockroaches down and won us it… Because of that we were able to clear out the inner part of the teleport hub and that person has a blessing from Balona that gave favorite enemy vermin for 1 week to a month. This one worked the same as the last one but there was a circle in the middle and every once in a while everything would disappear and reappear again. The people who were teleported were fine unless they had magical transportation issues and just saw blue and could not move. We won that one too!
- [ ] [6]> Explore sinkhole opened up in house - grows bigger
  We did not have time last week
- [ ] [5]> Guard tunnel scout inspecting passages for damage
  There was an earthquake, thankfully the mage school does not believe there is any magic involved. After the earthquake the tunnels may be damaged and collapse.
- [x] ~~[7]>> Mage School requests dead spiders for alchemicals~~
  We tried this a week ago and completely failed. In this mission there were a bunch of what we believe to be Spider, Bigs and one Spider, Giant. This time we won because of how much healing we had!
- [ ] [6]>> Shipping warehouse infested with cockroaches
  There is a shipping warehouse that is infested with cockroaches. We need to clear it out to keep our at.
