- [x] ~~[9]> Fighter, PDs in Dueling Ring - Investigate~~
  At the dueling ring during a major duel to decide who represents Anguron one duelist permanently killed the other. The duelist swung trying to cut diagonally across the chest but cut through the neck which normally would just kill the duelist but this time it was a PD. We went to investigate it and met the person who swung the sword and they used it on one of us and it did nothing. We then learned that a priest in a black cloak came by when they were killed. We used tracker levels to follow the person and learned they worshiped death. We went in the direction and found a bunch of little kids (I would like to describe the kids imps are they even different) play fighting. Not very many people like them because people don't understand that they don't want people to die. We went to their temple and they all said what part of death they worshiped. There was the lost death, fated death, devouring death, merciful death, vengeful death, and 1 more that I forgot. We found the priest. The priest seems to be good but does not think they passed normally.

We went there and pieced together different pieces of information from historians, mages, guards, ect and found them. We chased them then we attacked them and they destroyed us, killed most of us and ran off.
